

Dear parents, teachers and students

In accordance to the advisory issued by Directorate of Education on April 13, 2022, the following measures must be observed by the students and staff members at all times, keeping in view the resurgence of COVID infection in Delhi and NCR:

- * Wearing of masks by the students, teachers and all staff of the school
- * Maintenance of social distancing to the possible extent
- * Regular washing of hands and use of sanitizer
- * Creating awareness about the prevention of COVID infection among students, teachers and support staff and parents visiting the school

- * It is emphasized that the child with flu-like symptoms must not be sent to the school and the medical report in this regard must be sent to the respective class teacher/ school authorities at the earliest, since it is mandatory for the school authorities to update the Directorate of Education on a regular basis if there is any case reported COVID positive on a particular day.

Please seek medical advice in case your ward shows any symptoms of COVID.

It is reiterated that you must keep the school authorities informed in case of any illness, and a medical fitness report is to be submitted on rejoining the school.

Stay safe and healthy!

With regards

Principal
